## DETAILED ACTION

### *Election/Restriction*

- A. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claim 1-6, drawn to a method of inhibiting inflammation by administering antibodies or antigen-binding fragments, classified in class 424, subclass 145.1.
  - II. Claims 7-16, drawn to a method of treating a mammal with an inflammatory disease by identifying cytokine expression levels and administering antibodies, classified in class 424, subclass 130.1.

- B. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are independent and distinct, each from the other, because the methods are practiced with materially different process steps for materially different purposes and each method requires a non-coextensive search because of different starting materials, process steps and goals.

It is brought to Applicants' attention that claim 16 is incomplete. It recites "The method of claim 12," but no additional information is provided. Appropriate correction is required.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

**Furthermore, in order for Applicants to be fully responsive, in addition to electing a group, they must further elect one chemokine from claim 1 to be examined.**

- C. A telephone call was made to Glenna Hendricks on July 21, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
